

**SPECIFICATION**

*Please replace paragraph [0014] with the following wherein underlines denote insertions and strikethroughs denote deletions:*

[0014] Power for the circuits is provided by the power bus 116 . A supervisory power circuit 134 monitors the power used by the circuit including the audio amplifier. The supervisory power circuit 134 signals the volume control circuit 136 when power sags below a pre-determined limit or threshold or when the power exceeds the specified or pre-determined limit. In this embodiment, the supervisor circuit monitors the voltage level. In this embodiment, the supervisor power circuit is a TPS3825 part supplied by Texas Instruments Inc.

*A clean version of paragraph [0014] as amended above is provided below:*
